## SMOOTH RESULTS

Our rollers evenly distribute asphalt, resulting in an extremely smooth surface and eliminating air pockets. New Beuthling machines are known for their consistently smooth results.

## SPLIT DRUM ADVANTAGE

New Beuthling asphalt rollers feature a split front drum design, enhancing maneuverability and reducing the risk of asphalt displacement during turns, ensuring a more uniform compaction.

## SIMPLER IS BETTER

Our rollers offer the right balance of power and precision for projects such as driveways, pedestrian walkways, and bike paths.

**BUILT FOR THE *WORK.***  
**TRUSTED FOR *GENERATIONS.***

## CUSTOMER TESTIMONIALS

“The split drum doesn’t stretch, pull or twist the asphalt.”

“When it is hot, the Beuthling roller leaves a like glass finish.”

“We have been using Beuthling rollers, the B100/B200s since the early 90s. We believe it’s one of the best static finish rollers out there!”

“Split drums almost anyone can roll, the articulated rollers you need to be experienced.”

“We love the maneuverability of a Beuthling. Handles straight aways, corners and tight fits better than any other roller of comparable size on the market.”
